■ Grass Chopping Crusher

MODEL	POWER (KW)	CAPACITY (KG/H)	TOTAL WEIGHT (KG)
3T	4	500-3000	120
3.8T	4.5	900-3500	150
4.8T	5.5	1000-4000	160
5.8T	5.5	1100-5000	205
6.8T	7.5	1500-6000	292

■ Diesel Grass Chopping Crusher

MODEL	POWER (HP)	CAPACITY (KG/H)	TOTAL WEIGHT (KG)
3T	6	500-3000	165
3.8T	6	900-3500	190
4.8T	8	1000-4000	206
5.8T	8	1100-5000	231
6.8T	12	1500-6000	355

■ Grass Chopping And Crushing Machine

MODEL	POWER (KW)	CAPACITY (KG/H)	TOTAL WEIGHT (KG)
3.8T	4.5	500-3000	159
4.8T	5.5	900-3500	190
5.8T	5.5	1000-4000	225

■ Diesel Grass Chopping And Crushing Machine

MODEL	POWER (HP)	CAPACITY (KG/H)	TOTAL WEIGHT (KG)
3.8T	6	500-3000	183
4.8T	6	900-3500	215
5.8T	8	1000-4000	256

FAQ

■ What materials can it crush?

This machine works with various fibrous materials like hay, fresh grass, silage, alfalfa, Sudan grass, straw, corn stalks, sorghum, cotton stalks, wheat straw, bean vines, and weeds.

The upgraded model also crushes corn, soybean meal, bran, dried sweet potatoes, broken grains, rice bran, and peanut shells. It is well suited for mixed feed processing.

■ How often to change blades or hammers?

Check the blades or hammers every 3 to 6 months, depending on use and material. Replace them if they are dull or deformed to keep performance steady.

■ Does it clog? Can it run continuously?

The machine runs smoothly with both forage and grain materials. It supports continuous use for 1–2 hours without clogging, if the feed is even. For wet or long materials, drying or cutting them beforehand helps prevent blockages.

■ Can it cut and grind at the same time?

Yes. The chaff cutter and grinder are separate systems powered by the same motor. You can use them independently or together, depending on your needs.

■ How often should I clean the screen?

Clean the screen daily after use. For silage or wet grass, clean more often. Use a brush to avoid damaging the screen.
